

DCN multimedia System Inst. Cable 250m

www.boschsecurity.com

BOSCH
Invented for life

The System Network Installation Cable is used when loop-trough and redundant cable connections are required. It is similar to the system network cables series, but without the connectors. The system network installation cable can be used to make cables with a maximum length of 100 m (328.084 ft) by terminating the system connector using the system cable toolkit.
